PROJECT PROPOSAL

Client Management Platform

Prepared exclusively for

ANT META

https://antmeta.in

Powered by

BuLLM Coding System

with Claude Code Opus 4.5

January 27, 2026

This proposal is valid for 7 days from the date above.

The Opportunity

You're building something exciting at Ant Meta: A platform that helps traders access professional copy trading services. But managing clients, tracking performance, and scaling your partner network shouldn't slow you down.

That's where we come in.

We're proposing a vibe-coded Progressive Web App (see addendum) that puts your clients in control while giving you complete visibility over your business. From automated KYC to real-time P&L tracking, everything your team needs in one place.

Why BuLLM Coding System?

Your app won't be built the traditional way. We use the **BuLLM Coding System**, a revolutionary approach that combines AI-powered "vibe coding" with human expertise, powered by **Claude Code Opus 4.5**.

1	Product Requirements Doc: We translate your vision into clear specifications
2	Vibe-Coded Development: AI-enhanced coding powered by Claude Code Opus 4.5
3	Code Review & Testing: Rigorous quality checks before you see it
4	Deploy on Cloud: Secure, scalable AWS infrastructure
5	Go-Live: Your platform launches to the world
6	Product Support: We're here when you need us
7	Training: You learn to manage the platform confidently

□ **The Result?** Faster delivery, cleaner code, and a product that actually matches what you envisioned.

What You Get

For Your Clients — A Modern Progressive Web App

Your clients deserve an experience that feels premium from day one. Here's what they'll love:

√ Quick Registration with OTP

No lengthy forms or complicated passwords. Clients sign up with just their mobile number.

OTP verification ensures security while keeping the experience frictionless and fast.

√ Automated KYC Verification

PAN and Aadhaar verification happen automatically through DigiLocker integration.

What used to take days now happens in minutes – no manual document checking required.

√ Flexible Subscription Management

Three clear tiers: Standard (₹10K/mo), Premium (₹15K/mo), and Exclusive (25% profit share).

Clients can view, upgrade, or manage their plans anytime without contacting support.

√ Real-Time P&L Dashboard

Beautiful visualizations showing portfolio performance, gains, and historical trends.

Clients stay informed and engaged – reducing support queries and building trust.

√ One-Click Exchange Integration

Connect to Binance instantly with secure API key management built right in.

No technical knowledge needed – guided setup makes onboarding a breeze.

√ Smart Invoice Tracking

All pending and paid invoices in one clean view with download options.

Automatic invoice generation for Exclusive plan clients based on profit calculations.

√ Multi-Channel Support

Reach out via Chat, Email, WhatsApp, or Telegram – whatever works best.

Integrated support centre means clients never feel stranded or frustrated.

√ Dual Payment Gateway

Razorpay for Indian clients, Stripe for international – seamless for everyone.

Multiple payment options mean fewer abandoned sign-ups and smoother conversions.

√ Partner Application Flow

Ambitious clients can apply to become partners directly through the app.

Grow your network organically while keeping the process structured and trackable.

√ Beautiful Dark/Light Themes

Let clients choose their preferred visual experience with one tap.

Small details like this show you care about user experience – and they notice.

For Your Team — A Powerful Admin Backend

While your clients enjoy the front-end, your team gets complete control behind the scenes:

√ Live Business Dashboard

Total clients, AUM, subscription breakdown, and partner stats — all at a glance.

Make data-driven decisions without digging through spreadsheets or multiple tools.

√ Smart Customer Management

Auto-generated Client IDs (like 260116100001) keep everything organized.

Add, approve, or manage clients with full visibility into their journey and status.

√ Copy Trading Command Centre

Monitor all trading activity from your master account in real-time.

See which clients are connected, track performance, and manage positions centrally.

√ Automated Invoice Generation

For Exclusive plan clients, P&L is captured and invoices are created automatically.

No more manual calculations or chasing payments — the system handles it all.

✓ **Partner Management System**

Partners get their own restricted admin panel to manage their clients.

You control what they see and do – protecting sensitive business information.

✓ **Centralized Communication Centre**

All client communications in one place — never lose track of a conversation.

Quick responses build trust; this tool makes it easy to stay on top of everything.

Technology Stack

We've chosen a modern, proven tech stack that balances power with simplicity:

Layer	Technology
□ **AI Development**	**Claude Code Opus 4.5 (Vibe Coding)** AI-assisted development for faster, cleaner code
📱 **Frontend**	**React Native (PWA for Android & iOS)** Single codebase, native performance on all devices
⚙□ **Backend & Database**	**Supabase (PostgreSQL, Auth, APIs, Storage)** All-in-one backend with real-time capabilities
☁□ **Infrastructure**	**Cloud-based Deployment (AWS or equivalent)** Scalable, reliable, globally accessible
🔒 **Security**	**Role-based Access Control & Encrypted Data** Enterprise-grade protection for sensitive client data
Domain	**https://antmeta.ai/**

Your Investment

We believe in transparent pricing. Here's exactly what you're investing in:

Component	Investment
Complete Platform Development ▸ Client PWA with 10 premium features ▸ Admin Backend with 6 powerful modules ▸ Complete infrastructure & deployment setup	**₹2,10,000**

☐ **Special Offer:** IP Not Needed Discount of 25% applied!	
IP Not Needed Discount (25%)	- ₹52,500
FINAL INVESTMENT	**₹1,57,500**

Optional Add-on

BuLLMQL Full Integration *Lead Automation Engine with 6 components*	**₹60,000**

Recurring Costs

Cloud Hosting on AWS @ actuals	₹2,000 / month (Approx.)
App Management & Support (AMC) *Paid upfront quarterly*	₹10,000 / quarter

** GST extra as per government norms*

Payment Terms

We've structured payments around key milestones so you always know where your investment is going:

Milestone	Percentage	Amount
Advance (Project Kickoff)	**50%**	**₹78,750**
After Delivery for Testing	25%	₹39,375
Upon Final Acceptance	25%	₹39,375
Total	**100%**	**₹1,57,500**

+ GST as applicable
+ First quarter AMC (₹10,000) payable after go-live

What Happens Next?

1. You say yes *(we're sure you will!)*
2. We finalize the requirements together
3. Development begins with BuLLM + Claude Code Opus 4.5
4. You get a working app for testing in 7 days

We refine in 5 days based on your feedback

5. Go live and start onboarding clients in 2 weeks!

Ready to build something great together?

Let's get started.

Notes

What is a PWA?

A Progressive Web App is a website that looks and feels like a native mobile app. PWAs are "web apps built and enhanced with modern APIs to provide enhanced capabilities while still reaching any web user on any device with a single codebase."

Your clients can install it on their phones, access it offline, and receive notifications – just like a native app — but without downloading anything from an app store.

Why PWA is the smarter choice for Ant Meta:

Mobile App Challenges	PWA Advantages
Separate iOS and Android development = 2x cost	Single codebase works on ALL devices
App Store approval can take weeks + 30% fees	Instant deployment, no store approval needed
Users must download and update manually	Always up-to-date, installs in one tap
Takes storage space on user's phone	Lightweight – uses minimal storage
Bug fixes require new store submission	Updates go live instantly
